

PUBLIC HEALTH REPORTS.

VOL. XXVI.

DECEMBER 1, 1911.

No. 48.

THE CHOLERA SITUATION.

The cholera situation in Italy continues to improve. On November 10 all the Provinces of northern Italy were declared free from cholera by the authorities. Only a few scattered cases of the disease are now being reported each week in Russia. In Austria-Hungary a few cases continue to be reported. According to last advices an occasional case of cholera was still occurring in Marseille. In Tunis, in Africa, the disease has continued to spread, and a large number of cases are being reported. In Asia Minor the disease has been reported from certain localities.

(1883)

UNITED STATES.

MUNICIPAL ORDINANCES, RULES, AND REGULATIONS PERTAINING TO PUBLIC HYGIENE.

[Adopted since Jan. 1, 1910.]

KANSAS CITY, MO.

MILK—PRODUCTION, CARE, AND SALE.

SEC. 1. No person, firm, or corporation shall sell or keep for sale or offer for sale any milk or cream or food product thereof at a higher temperature than 50° F., or which is unclean, impure, or unwholesome, or any milk, cream, or food produce thereof, without procuring from the inspector of foods a permit therefor, which shall be good for the period of one year from the date of issue, but subject to revocation, and which shall be granted upon the following conditions, to wit: The applicant shall pay to the city treasurer and take his receipt therefor the sum of \$1 to cover the expense of examination hereinafter provided for and present such receipt to the inspector of foods and make an application in writing, setting out the following:

First. The name and residence of the applicant, or, if a firm, the name and residence of each of the members of said firm, or, if a corporation, the name and residence of the president and secretary of said corporation.

Second. The location of the business place or places of the applicant, giving the street and number of the same, and the number, name, and residence of the person in charge of each place of business if applicant maintains place of business.

Third. The number of cows owned or controlled by the applicant and the location of applicant's dairy, if applicant has dairy.

Fourth. The name of the owner or owners of and the location of the dairy or dairies of all persons from whom applicant obtains milk or cream supplies, and the number of cows owned or controlled by each, if applicant does not furnish milk or cream from his own dairy.

Fifth. An agreement by applicant that the inspector of foods or one of his assistants may at any time inspect applicant's dairy herd or herds, dairy or dairies, and the dairy herd or herds and dairy or dairies of all persons from whom applicant obtains milk or cream, wherever located; and if upon such inspection any dairy be found to be in an unsanitary condition or the method of handling the milk or cream be unsanitary, or any dairy herd be found to be diseased, upon written notification thereof to the said applicant said applicant hereby agrees to discontinue immediately his supply of milk or cream from such dairy or dairy herd, and if such supply of milk or cream be not so discontinued said applicant agrees that his permit or license may be suspended by said inspector of foods and revoked by the hospital and health board, and upon the further condition that upon inspection by the inspector of foods or his deputy of the cows and dairy or dairies from which applicant obtains his milk product such cows and dairy or dairies are free from disease and maintained in a clean and sanitary condition and shall be so found to be by such inspector or his deputy and that all herds shall at least once a year be tested for tuberculosis and a certificate from a recognized veterinarian or from the State veterinarian or his representatives be furnished said inspector.

SEC. 2. If the foregoing conditions are found to be complied with, the inspector of foods shall register such applicant and grant him such permit to do business for one year from the date of issue of same, but subject to revocation as is hereinafter provided.

SEC. 2a. Every dairyman, wholesale or retail dealer handling milk or milk products in any form shall post his license or permit in a conspicuous place on his premises for which it has been issued.

SEC. 3. If the cows or dairy or dairies from which the applicant obtains his milk, cream, or product thereof, whether belonging to applicant or others, shall be diseased,

December 1, 1911

or not kept in a clean and sanitary condition, so that said milk, cream, or the product thereof are wholesome when examined by such food inspector, or his assistants, such permit shall be refused, and if at any time after the granting of such permit it shall appear to said inspector of foods that said cows, dairy or dairies from which said applicant obtains his milk, cream, or product of milk are diseased and not kept in a clean and sanitary condition, so that products thereof become unwholesome, said inspector of foods shall notify said applicant in writing of such condition, and in case the applicant shall not immediately discontinue his supply of milk, cream, or product thereof from such cows, dairy, or dairies said inspector of foods shall temporarily suspend such permit, and the hospital and health department may, after notice and hearing given to such applicant, revoke his permit.

SEC. 3a. All milk shall be strained immediately after the same is milked from the cow, through a strainer composed of one layer of cheese cloth on top of which shall be placed one layer of absorbent cotton, this in turn to be covered with another layer of cheese cloth, and the fresh milk poured through the same into a clean and sanitary container. These strainers not to be used excepting at one milking without either sterilization or a complete new strainer.

SEC. 4. Milk, cream, and the food products thereof are deemed unwholesome if the milk is drawn from the cows kept in a crowded condition in a place not well ventilated or lighted or in a place filthy or insanitary, from unclean or diseased cows, or those fed with distiller's waste, wet brewer's grains, waste of vinegar or sugar factories, garbage, or decayed substance in any form except ensilage from silos properly managed; milk drawn from cows 15 days before or 8 days after the birth of a calf, or milk, cream, or the products thereof which have been kept in or near stable where animals are housed, or in any building attached to such stable, or in any place where the air is bad, or cream taken from unwholesome or adulterated milk shall be deemed unwholesome and adulterated within the meaning of this ordinance; milk from which any normal ingredient has been extracted, or milk containing any substance not a normal constituent thereof, or milk or cream containing over 300,000 bacteria to the cubic centimeter is deemed unwholesome and injurious to human beings.

SEC. 5. The inspector of foods of Kansas City and his agents and representatives shall at all times have the power to enter any stable where cows are kept, or any dairies from which milk, cream, or product thereof is taken for the purpose of sale in Kansas City, and inspect such cows and their milk, the food and water given such cows and the water in which milk utensils are cleansed, and the refusal of the person in charge of such cows, dairy or dairies, or place where milk, cream, or food products are kept to permit such inspector, his agents or representatives, entrance for the purpose of inspection shall be sufficient cause for the hospital and health board to revoke the permit of the person using the milk, cream, or product thereof from such cows, dairy or dairies, or places where milk, cream, or products thereof are kept.

SEC. 6. Any person, firm, or corporation that shall change its source of supply of milk, cream, or product thereof shall notify the inspector of foods of such change and shall make a new application for a permit as in the case of an original application and pay the same fee therefor, and the duty of the food inspector and the rights of the applicant shall be the same as in case of the original application. The failure to notify such inspector for five days thereafter of such change shall be a sufficient ground to revoke the permit granted on the part of the hospital and health department.

SEC. 6a. Milk and cream shall not be mixed or prepared in the street or in a vehicle, and the distribution of milk and cream in pouring cans or containers shall be done at the milk depot or dairy, and is hereby prohibited on the streets. Milk for delivery in bulk shall be carried in covered pouring cans provided with tight faucet. Milk shall not be dipped from farmer's or stock cans for delivery to the consumer.

SEC. 6b. Every milkman, dairy, or dairies, or those having and milking one or more cows within the meaning and interpretation of this ordinance, shall comply with the following 20 dairy suggestions as promulgated by the United States Department of Agriculture, as follows:

"*The cows.*—Have the herd examined at least twice a year by skilled veterinarian. Promptly remove animals suspected of being in bad health. Never add an animal to the herd until certain it is free from disease, particularly tuberculosis.

"Never allow a cow to be excited by fast driving, abuse, loud talking, or unnecessary disturbance; do not expose her to cold or storms more than necessary.

"Clean the entire body of the cow daily, hair in the region of the udder should be kept short by clipping.

"Do not allow any strong flavored food, like garlic, cabbage or turnips, to be eaten, except immediately after milking. Changes in feed should be made gradually.

"Provide fresh pure water in abundance, easy of access, and not too cold.

"*The stables.*—Dairy cattle should be kept in a stable preferably without cellar or storage loft, and where no other animals are housed.

"The stable should be light (4 square feet of glass per cow) and dry, with at least 500 cubic feet of air space per animal. It should have air inlets and outlets, so arranged as to give good ventilation without drafts of air on cows.

"The floor should be tight and constructed preferably of cement; walls and ceilings should be tight, clean, free from cobwebs, and whitewashed twice a year. Have as few dust catching ledges, projections, and corners as possible.

"Allow no dusty, musty, or dirty litter, or strong-smelling material in the stable. Haul manure to field daily, or store under cover at least 40 feet from stable. Use land plaster daily in gutter and on floor.

"*Milk house.*—Have a light, clean, well-ventilated and screened milk room located so as to be free from dust and odors.

"Milk utensils should be made of metal, and all joints smoothly soldered. Never allow utensils to become rusty or rough inside. Use them only for handling, storing, or delivering milk.

"To clean dirty utensils, use only pure water. First rinse the utensils in warm water. Then wash inside and out with hot water in which a cleansing material has been dissolved, and rinse again. Sterilize with hot water (boiling water or steam). Then keep inverted in pure air and sun, if possible, until wanted for use.

"*Milking and handling milk.*—Use no dry, dusty food just previous to milking.

"The milker should wash his hands immediately before milking, and milk with dry hands. He should wear a clean outer garment, kept in a clean place when not in use. Tobacco should not be used while milking.

"Wipe the udder and surrounding parts with a clean damp cloth immediately before milking.

"In milking be quiet, clean, and thorough. Commence milking at the same hour every morning and evening, and milk the cows in the same order.

"If any part of the milk is bloody, stringy, or unnatural in appearance, or if by accident dirt gets into the milk pail, the whole should be rejected.

"Do not fill the cans in the stable. Remove the milk of each cow at once from the stable to the milk room. Strain immediately through cotton flannel or cotton. Cool to 50° F. as soon as strained. Store at 50° F. or lower.

"Never mix warm milk with that which has been cooled, and do not allow milk to freeze.

"A person suffering from any disease, or who has been recently exposed to a contagious disease, must remain away from the cows and milk."

SEC. 6c. Five thousand copies of this ordinance are hereby authorized to be printed and a copy to be furnished and delivered to each and every firm, person, or corporation operating or owning a dairy or dairies, milk depot, store, or other distributing station, selling or handling milk or the products thereof, in or out of the city, within the authority of this ordinance.

SEC. 7. This ordinance shall not take effect until 60 days after its approval by the mayor.

SEC. 8. Any person, firm, or corporation that shall violate any provision of this ordinance shall be guilty of a misdemeanor and, on conviction, shall be fined not less than \$10 or over \$500 for each and every violation.

SEC. 9. All ordinances or parts of ordinances in conflict with this ordinance are, in so far as they so conflict, hereby repealed. [Ordinance adopted Nov. 14, 1910.]

MILK—REGULATION OF DAIRIES AND DISTRIBUTING STATIONS.

RULE 1. No person by himself or his servant, or agent, or as the servant or agent, of any other person, dairy farm, or corporation, shall, in the city of Kansas City, Mo., sell, exchange, or deliver any milk, skim milk, or cream which contains more than 300,000 bacteria per cubic centimeter or having a temperature above 50° F., or milk or cream which is produced in any dairy that does not meet with the requirements of the hospital and health board.

RULE 2. All buildings for handling milk shall be so located as to afford abundance of light and pure air.

RULE 3. The room or rooms in which milk is handled shall be so constructed as to avoid contact with contamination.

RULE 4. The walls and ceilings of all rooms in which milk is handled shall be kept clean and free from dust, and disinfected at least once each month.

RULE 5. The floors of all rooms in which milk is handled shall be covered with cement or other water-tight substance, and the surface graded to permit the quickest escape of fluids to properly constructed sewer connections.

RULE 6. All rooms in which milk is handled shall not be used for any other purpose.

December 1, 1911

RULE 7. All wholesale or distributing depots shall provide convenient toilets or toilet rooms separate and apart from the room or rooms wherein milk or any products thereof is kept or handled. The floors of such toilet rooms shall be of cement, tile, wood, brick, or other nonabsorbent material and shall be washed and scoured daily. Such toilet or toilets shall be furnished with separate ventilating flues or pipes opening on the outside of the building in which they are situated.

RULE 8. There shall be provided lavatories and wash rooms adjacent to toilet rooms, and shall be provided with running water, soap, and towels, and shall be maintained in a sanitary condition.

RULE 9. All employees, clerks, or other persons who handle milk or any products thereof, before beginning work or after visiting toilet or toilets, shall wash their hands and arms thoroughly in clean water.

RULE 10. No employee, clerk, or other person shall expectorate on the floor or side walls of any building or rooms where milk or its products are handled or stored or offered for sale.

RULE 11. Cuspidors for the use of employees, clerks, or other persons shall be provided whenever necessary, and each cuspidor shall be thoroughly emptied and washed out daily with disinfectant solution, and 5 ounces of such a solution shall be left in each cuspidor while it is in use.

RULE 12. No person or persons shall live or sleep in any room or rooms, nor any room or rooms opening directly into such room or rooms, where milk or its products are handled, stored, or kept for sale.

RULE 13. All persons or employees handling milk or its products shall keep themselves and clothing in a clean condition, and shall be free from any communicable disease.

RULE 13a. In homes where there exists a contagious or infectious disease milk can be delivered, but a receptacle to receive the same must be furnished by the householder, and placed into a convenient place for the delivery by the milkman. This rule must be strictly complied with by all dairy or milk men, under penalty of revokal of license.

RULE 13b. No person having an infectious disease, or recently been in contact with a person having a contagious disease, shall milk or handle cows, measures, or other vessels used for milk intended for sale, or until all danger from communicating such disease to other persons shall have passed, as determined by the commissioner of health.

RULE 14. Milk must not be sold in bottles except under the following rules, viz:

(a) The bottles must be washed clean with hot-water solution of soap or soda or some other alkali, then with hot water before filling with milk.

(b) Bottles must not be filled except at dairy or creamery, and in the city only in a room so situated as to prevent contamination by dust or other substance from the street or elsewhere. All bottles must be provided with proper top before leaving such room or milk house.

(c) Bottles must not be filled in any room used for domestic or sleeping purposes, nor opening into same.

(d) The practice of taking empty bottles from a home and refilling before they have been thoroughly cleaned will not be permitted.

(e) Any dirt found in milk or dirty bottles shall constitute an adulteration, and be subject to a penalty or revokal of license.

All wagons transporting milk to the city for distribution, wholesale or retail, must bear the name and of dairy or farm from which milk is obtained upon the wagon in Gothic letters large enough to be read at 50 feet.

The name of the owner of the dairy and number upon the wagon must be filed with the department of health in Kansas City, and should a change occur by transfer of dairy farm, the health department must be notified immediately.

RULE 15. No milkman, wholesale or retail, will be permitted by the department of health to remove bottles or cans from a home, tenement, or apartment house in which any contagious or transmissible disease is confined, under penalty of fine in the municipal court, and a revokal of license.

RULE 16. All wagons or conveyances used in the delivery or transfer of milk or its products shall be kept clean and in good repair.

RULE 17. All utensils, cans, bottles, jars, tubs, carton, vats, or any other receptacles in which milk or its products are handled or kept, must be absolutely clean, and shall be used for no other purpose.

RULE 18. All open wagons or other vehicles used for the transportation of milk shall be provided with a tarpaulin, and all milk transported or delivered in open wagons or other vehicles shall be properly covered with such tarpaulin. [Regulation, department of health, adopted Nov. 29, 1910.]

MEMPHIS, TENN.

MILK—PRODUCTION, CARE, AND SALE.

SECTION 1. No person, firm, or corporation shall produce for sale, sell, offer for sale, or have in his or their charge, custody, or control, for sale or distribution within the city of Memphis, any milk, cream, or buttermilk without first obtaining a permit from the department of health to conduct such business or distribution, under penalty as hereinafter provided.

SEC. 2. *Application for permit.*—Application for a permit to conduct a milk business in the city of Memphis shall be made in writing to the department of health at least 10 days prior to the time it is desired to engage in and begin such business. The purchase of a business already in operation requires application for a new permit as outlined above. All permits are to be issued for a period of one year. All applications shall set forth the name and residence of the applicant, if an individual, and the names and residences of the principal officers, if the applicant is a corporation, together with the location of the place for which such permit is desired. Such application shall also state whether the milk is to be sold in a store or depot or from a delivery wagon. This application must state specifically the number of wagons that are to be employed in the business, and each such wagon shall have painted in conspicuous positions on both sides the name of the individual or firm to whom such permit has been issued, together with the permit number, in letters not less than 4 inches in height, and the name on the wagon must at all times be the same as that under which the permit has been issued. This application shall further state whether the milk, cream, or buttermilk is to be sold in bottles exclusively or in bulk and bottles; it shall also state whether cows are to be kept, and if so, shall state their number and location.

SEC. 3. *Inspection and investigation of previous record.*—No application for a permit shall be approved by the department of health after September 1, 1910, if the records of the milk section of the department of health show that the dairy, milk depot or store, or any part of any establishment in which milk, cream, or buttermilk is being handled, prepared, or stored is in an unsanitary condition or being operated in violation of the ordinances of the city of Memphis or the rules of the department of health. If the applicant's record is not on file in the office or the applicant be newly engaging in the milk business, an inspection of his place shall be made within five days (excluding Sundays and legal holidays) after such application has been made to the department of health; which inspection shall determine the suitableness of location, the condition of equipment, the sanitary condition of the premises and the methods of applicant. No permit shall be approved if the applicant has a bad record. The applicant, if refused a permit on account of unsanitary condition, lack of equipment, faulty methods, or for repeated adulteration of milk, cream, or buttermilk, may appeal to the superintendent of the department of health for a hearing. The superintendent of the health department may, at his discretion, recommend the applicant for a permit, if he is satisfied that the ordinances of the city of Memphis and the regulations of the department of health will be conformed to in the future.

SEC. 4. *Revoking of permit.*—If at any time after the granting of a permit as above provided the holder fails to comply with the sanitary requirements of the health department or the rules hereinafter enumerated, or repeatedly sells or offers for sale milk, cream, or buttermilk below standard or otherwise adulterated within the meaning of the ordinances of the city of Memphis, or in violation of this ordinance or any of the provisions thereof, the superintendent of health shall revoke his or their permit with or without notice and no liability shall attach to the city of Memphis or to any officer of the department of health by reason of such revocation, nor shall the city be required to refund any money for the unexpired term of any such permit. The superintendent of the health department may grant the defendant a hearing, if he deems this necessary.

SEC. 5. *Reissuing of revoked permit.*—If after the revocation of a permit the defendant complies with the requirements of the health department and makes manifest his intention to meet them in the future the superintendent of health may at his discretion recommend that the permit be reissued.

SEC. 6. *Permit exhibited.*—Every milk dealer shall post his or their permit in a conspicuous place on the premises for which it has been issued, as provided in section 2 of this ordinance.

SEC. 7. *Publishing standing of dairymen and milk dealers.*—It shall be the imperative duty of the department of health to publish monthly in the daily newspapers of the city of Memphis the names, score condition of equipment, methods, sanitary condition, and such other data as they may think proper to inform the consuming public of the standing and efficiency of every dealer in milk in the city of Memphis.

December 1, 1911

SEC. 8. *Penalty for violation.*—Any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and shall, upon conviction thereof, be fined not less than \$5 nor more than \$50 for each offense and it is hereby further provided that three violations of this ordinance within a period of one year shall revoke the permit of any dealer in milk or its products, and such permit may not be reissued under any circumstances until a full year has elapsed since the date of the last violation and then only at the discretion of the superintendent of health.

SEC. 9. No permit shall be issued by the health department for the sale of milk, cream, or buttermilk in the city of Memphis, unless the following rules and regulations are first complied with:

RULE 1. *Tuberculin tests.*—All cattle in herds used in the production of milk, cream, or buttermilk for sale within the city of Memphis must be tested with tuberculin at least once in each 12 months. The test shall be made by an official veterinarian of the health department of the city of Memphis, who shall be appointed by and hold office at the will of the superintendent of the department of health, to whom he shall make all reports and from whom he shall receive all orders.

The owner of all the cattle tested shall pay into the department of health a fee of 50 cents per head for the cattle thus tested. All tested animals shall bear an official tag of the department of health indicating the series and number assigned to the animal.

A statement must be filed by the official veterinarian with the health department for each tuberculin-tested animal, both male and female, dry and in milch, in herds used in the production of milk, cream, or buttermilk, for sale within the city of Memphis. This statement must indicate the number and series given to each animal, which number and series must correspond with that on the tag worn by the animal. In addition the statement must show the temperature record of the animal on the days preceding and following the test, the date and exact time of taking these temperatures and the date and time of making the injection and the amount and kind of tuberculin used. The official veterinarian shall brand all reacting cattle with the letter "T" on the right hip and these cattle are to be immediately isolated and the entire premises thoroughly disinfected under the direction and supervision of the health department of the city of Memphis. Dairymen purchasing cattle from adjoining States are to purchase only tuberculin-tested animals; all such animals shall be tagged with an official tag, showing that they have been inspected and passed by the State veterinarian of the State whence they came during the then current year.

RULE 2. *Milk depots and dairies.*—By a "milk depot" is meant any place, house, or room where milk is received from the dairy or dairies, and includes all ice-cream factories, and prepared for distribution. By a "dairy" is meant any place where cattle are kept for the production of milk.

RULE 3. *Where to be established.*—No milk depot shall be established or maintained in a room or rooms which communicate directly with any living rooms, kitchen, toilet, laundry, or stable or places where animals are kept or slaughtered. No milk depot shall be maintained which communicates in any way with a horse or cow barn, and shall be separated therefrom by an air and odor proof partition or wall. The immediate vicinity of the milk depot, especially within 25 feet of the doors and windows thereof, shall be kept free from accumulations of rubbish, garbage, manure, and any other putrefying, decomposing, infectious, and bad-smelling substances.

No dairy shall be established or maintained in unsanitary surroundings where it is designed to offer such milk to the citizens of Memphis. Unsanitary conditions will be deemed to exist whenever and wherever properly constructed barns, milk rooms, and utensils are not provided; where the cattle are dirty, unhealthy, crowded, fed distillery waste, slop, or other food forbidden by the ordinances of the city of Memphis; where the utensils are not kept clean; where the premises are not kept clean; where the udders of all cows are not washed in clean water and dried with clean cloths prior to milking; where the attendants do not wash and put on a clean outer garment prior to milking; where the milk is not immediately removed from the barn to the milk room immediately after milking each cow, and there promptly cooled; where floors of impervious material are not provided in milk rooms and stables; where screens are not provided; and where the owner refuses to permit an inspection of his premises, or who refuses to cooperate with the officers of the department of health.

RULE 4. *Construction.*—The floors in dairies, stables, milk rooms, and milk depots shall be smooth, free from crevice and defects and water-tight, and constructed of impervious material, such as cement, asphalt, or tiles laid in cement. It shall be well drained, and the drains must be trapped and ventilated. The walls and ceilings shall be smooth, tight, and free from unnecessary projections, niches, etc., and kept well painted, whitewashed, and in the case of stables must be provided with metal stanchions and partitions, round-bottomed metal feed troughs, glass windows corresponding to 4 square feet of glass per cow, the King or muslin system of ventilation

must be employed, no side sheds are to be attached, manure must be removed at least twice daily to a pit or field at least 200 feet from the barn, 600 cubic feet of space must be allowed for each cow stabled. The milk room shall be provided with glass windows, proper cooling tanks for the milk, smooth and tight walls and ceilings, and must be screened between April 1 and November 1 each year, as must be all milk depots.

RULE 5. Ventilation.—All depots and milk rooms shall be provided with adequate ventilation by means of windows, air shafts, air ducts, and other mechanical apparatus, if required, so as to insure free circulation of fresh air at all times.

RULE 6. Wash rooms.—Wherever milk is bottled or otherwise prepared, whether at the dairy or at a milk depot, a separate room shall be maintained for the purpose of receiving, storing, and cleaning cans, bottles, and other utensils used in the conduct of the business, which shall be known as the "wash room." This shall be separated from that part of the milk depot where the milk is stored and bottled by a complete partition and door. The wash room shall be so located that dirty utensils do not have to pass through or be received in the room in which the milk is handled or prepared. The floor of the wash room shall be so arranged that its drainage does not run into the milk room. Dirty cans and utensils shall not be taken into, kept, or stored in the milk room.

RULE 7. Appliances.—Vats shall be constructed of impervious material, and shall have a smooth inner surface. They shall be provided with dust-proof covers and be drained indirectly into the sewer, or, if in unsewered territory, shall drain to a distance of 200 feet or more away from the milk room and wash room. The water in the vats shall be kept clean, sweet, and free from sediment and odor. The vats shall always be kept clean, free from dust, slime, sediment, or milk crusts. The temperature of the water shall not be above 50° F.

Refrigerator and ice boxes.—The inner wall of the compartment of the refrigerator and ice boxes where the milk is kept shall be smooth and metal or porcelain lined. The floor shall be drained indirectly into the sewer. The milk department shall be kept clean and free from any odor. Nothing but milk and milk products shall be stored in the ice box. This applies to all groceries and meat markets handling milk, as well as to depots and dairies.

Bottling machine.—Where used, the bottling machine shall be so constructed that it can readily be taken apart and cleansed, especially the springs and plungers. It shall be cleansed thoroughly every day, and when not in use it shall be covered with clean cloth or glass case.

Drying racks.—Drying racks shall be provided on which bottles and cans can be placed in an inverted position, for proper drainage. In no instance shall bottles be inverted in bottle cases for the purpose of draining and drying.

Pasteurizers and separators.—Pasteurizers and separators shall be so constructed that all parts, including pipes, can readily be cleansed and sterilized. These appliances must be kept scrupulously clean, inside and outside, at all times. The water used in connection with the dairy or dairies or milk depots shall be submitted to the city chemist for analysis whenever he may so request.

RULE 8. Utensils.—All shipping cans, bottles, dippers, skimmers, measures, strainers, stirrers, and other utensils must be so constructed that all parts are absolutely free from spaces where milk can accumulate or soak in, so that it can not be removed by simple washing. The surface coming in contact with milk, cream, or buttermilk must be smooth and free from excessive rust. All utensils must be kept scrupulously clean, inside and outside, at all times. Utensils must be kept in good repair and free from rough surfaces of any kind. When not in use they shall be kept dry, inverted, and on specially provided racks or hooks where flies can not reach them. Bottle caps must be kept in clean, covered, dry, and dust-proof receptacles.

RULE 9. Maintenance and care.—The floors shall be kept clean and scrubbed. Dry sweeping and dusting is not to be permitted. The walls, ceiling, shelves, windows, and all other surfaces must be clean and kept free from dust by washing or wiping with damp cloth. Unnecessary articles, such as boxes, old utensils, reserve stock blankets, harness, lanterns, paint cans, oil cans, and other articles not required in the milk business shall not be kept in a milk depot or milk room nor in the cow stables.

RULE 10. Attendants.—Every person in charge of such milk depot or dairy shall keep himself and his employees in a clean condition and cleanly clothed while engaged in the bottling, pouring, or other handling of milk, including milking of the cows. Smoking, snuffing, or chewing of tobacco is forbidden in a milk depot or milk room or while engaged in the handling of milk (actual contact), and plain notices shall be posted by the owner or manager of each milk depot or dairy forbidding all persons to use tobacco or expectorate while in the milk depot or milk room or in a stable where cows are being milked.

December 1, 1911

RULE 11. Communicable diseases.—No person with tuberculosis, any venereal disease, or any communicable disease shall work in any milk depot, dairy, or in any other place where milk or its products are handled. When typhoid fever, scarlet fever, diphtheria, smallpox, measles, chickenpox occur in the house or families of any one engaged in the handling of milk it shall be the duty of the owner or manager to notify the superintendent of the health department at once of this fact, so that the necessary regulations can be enforced in cooperation with the department of health, to prevent the spread of disease. No one afflicted with or convalescent from typhoid, scarlet fever, diphtheria, smallpox, measles, or any other communicable disease shall engage in the handling of milk, cream, or buttermilk, nor enter a milk depot or dairy during such period. When any of the above enumerated or any other communicable disease exists in the house or family of any one engaged in the handling of milk he shall at once discontinue his work in the milk depot, dairy, or on their vehicles. The depot, wagon, or dairy shall be declared infected if any one with or convalescent from any of the above enumerated or any other communicable disease has worked therein, thereon, together with all milk, cream, or buttermilk with which any such party may have come in contact. No person convalescent from any communicable disease or living in any house or on any premises where any communicable disease exists shall reengage in the handling of milk unless the department of health has enforced suitable quarantine regulations and the necessary disinfection has been done under the supervision and direction of the health department.

RULE 12. Operation.—All milk shall be stored at a temperature not above 50° F. No can or bottle of milk shall be completely submerged in impure water or water from impure or unsanitary ice. Impure ice, especially such ice sold for refrigerating purposes only, must not come in contact with milk and milk utensils or be used in water of milk vats. Sour milk must not be permitted to stand in the dairyman's cans. Nothing except milk, cream, or butter shall be permitted in the milk vats, ice boxes, and coolers. Returned empty bottles and other utensils must be thoroughly cleansed and sterilized before being conveyed into the milk room.

RULE 13. Milk delivery and milk vehicles—Transported in closed receptacles and in covered wagons.—Milk shall not be transported in open or improperly closed cans and receptacles. It shall be properly protected from the dust and the sun's rays with adequate covering. This covering shall be clean, nonodorous, and free from dust. Wagons used for the delivery of milk to consumers shall be covered with material that will allow of washing and shall always be kept clean. The interior of the wagon shall be kept clean, free from milk crusts, and odor of any kind. Driver's seats shall be divided off from the compartment or compartments where the milk and cream are kept. The compartments where milk and cream are kept shall be tight and opened only when necessary for the removal of their contents.

RULE 14. Preparing and bottling milk on street prohibited.—Milk and cream shall not be prepared or bottled in the street or in a vehicle. The distribution of milk and cream into specially constructed pouring cans shall be done in the milk depot and is prohibited upon the street. Milk for delivery in bulk shall be carried in covered pouring cans, provided with a spout or faucet. Milk shall not be dipped from dairy-men's or stock cans for delivery to the consumer.

RULE 15. Temperature of milk.—The milk for delivery to the consumer on the wagons shall not be above 70° F.

RULE 16. Utensils.—Here the same rules shall apply as for utensils used in milk depot. (See rule 8.)

RULE 17. Attendants and communicable diseases.—Same rule shall apply as for milk depots. (See rules 10 and 11.)

SEC. 10. Be it further ordained, That this ordinance take effect from and after its passage, the matter being one of necessity, and the public welfare requiring it. [Ordinance adopted Aug. 19, 1910.]

REPORTS TO THE SURGEON GENERAL, PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

PLAQUE-PREVENTION WORK.

DISTRIBUTION OF POISON.

In connection with the making and maintenance of a squirrel-free zone around the cities of California on San Francisco Bay 8,920 acres of land in Alameda County were covered with poison during the week ended November 11, 1911.

During the same period 10,660 acres of land in San Joaquin County and 4,980 acres in Stanislaus County were covered with poison for the purpose of eradicating plague foci.

SMALLPOX IN THE UNITED STATES.

In the following tables the States indicated by an asterisk are those from which reports of smallpox are received only from certain city, and in some cases county, boards of health. In these States, therefore, the recorded cases and deaths should not be taken as showing the general prevalence of the disease. In the States not marked by an asterisk the reports are received monthly from the State boards of health and include all cases reported throughout the State.

FOREIGN AND INSULAR.

AUSTRALIA.

Sydney—Examination of Rats.

The following information was taken from bulletins issued by the department of public health of New South Wales: During the 5 weeks ended October 14, 2,059 rats were examined for plague infection. No plague-infected rat was found.

The last case of human plague was reported May 29, 1909. The last plague-infected rat was found April 25, 1910.

AUSTRIA-HUNGARY.

Status of Cholera.

The following information was received from Chargé d'Affaires Grew at Vienna:

During the period from October 9 to 14, 2 new cases of cholera with 1 death were reported in Austria. These cases occurred at two localities situated in the Coastland.

During the period from October 7 to 16, 29 cases of cholera with 7 deaths were reported in Hungary, occurring as follows: In the town of Alsolupko 10 cases with 4 deaths and in the village of Kuman 19 cases with 3 deaths.

ECUADOR.

Plague and Yellow Fever.

The following information was received from the director of health of Ecuador for the period, October 16-31, 1911:

Plague.—At Guayaquil 51 cases with 18 deaths were reported.

Yellow fever.—At Bucay there were reported 2 cases, at Chobo 1 case, at Guayaquil 8 cases with 4 deaths, at Milagro 3 cases.

GREAT BRITAIN.

Case of Plague at Suffolk, England.

The following information was received from the American embassy at London: A case of plague occurred at the Admiralty Barracks at Shotley, county of Suffolk, in the person of a seaman who was admitted to hospital October 10. The case was bacteriologically verified. The origin of the infection has not been determined.

HAWAII.

Record of Plague Infection.

The last case of human plague at Honolulu occurred July 12, 1910.

The last plague-infected rat was found at Aiea, 9 miles from Honolulu, April 12, 1910.

A case of human plague was reported at Kapulena, Hawaii, October 28, 1911.

At Hilo the last case of human plague occurred March 23, 1910. A fatal case occurred at Honokaa, 60 miles from Hilo, April 20, 1911.

The last plague-infected rat was found at Honokaa February 2, 1911. A plague-infected rat was found at Hilo during the week ended June 10, 1911.

Chief Quarantine Officer Ramus reports, November 7:

Honolulu—Plague-Prevention Work.

Week ended Nov. 4, 1911.

Total rats and mongoose taken.....	617
Rats trapped.....	594
Mongoose trapped.....	16
Rats found dead.....	1
Rats killed by sulphur dioxide.....	6
Examined bacteriologically.....	526
Classification of rats trapped:	
<i>Mus alexandrinus</i>	79
<i>Mus musculus</i>	162
<i>Mus norvegicus</i>	72
<i>Mus ratus</i>	281
Classification of rats killed by sulphur dioxide: <i>Mus alexandrinus</i>	6
Average number of traps set daily.....	1,720

INDIA.

Calcutta—Cholera and Plague.

Acting Asst. Surg. Allan reports, October 26: During the week ended October 7, 14 deaths from cholera and 4 from plague were reported in Calcutta; in all Bengal, 32 cases of plague with 21 deaths; in all India, 10,382 cases of plague with 7,508 deaths.

Madras—Plague.

Consul Olivares reports October 24: The total number of deaths from plague in this consular district, including the Madras Presidency and the native States of Mysore and Hyderabad, during the week ended October 14 was 1,572, as compared with 1,524 during the preceding week.

ITALY.

Status of Cholera.

Passed Asst. Surg. King at Genoa reports November 11: The official cholera report dated November 10 shows no cholera present in Italy north of Sezze, a small town in the southern part of the Province of Rome. All the Provinces of northern Italy have been declared free from cholera. There has been no case of cholera in the city of Genoa for the past three weeks.

1909

December 1, 1911

Naples—Examination of Emigrants.

Surg. Geddings reports:

Vessels inspected at Naples and Palermo, week ended Nov. 4.
